Configuration

- 3mm ultra-thin cold-rolled steel painted panel
- 304 stainless steel water tank body
- High-end ultrasonic nebulizer
- Smart chip intelligent control system
- New generation of energy-saving and water-proof LED light source
- Waterproof silent fan
- Dual detection water level sensor
- Adopts PTC heating module and aluminum plate heat transfer device
- PC LCD touch control panel

Features

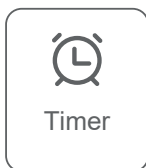

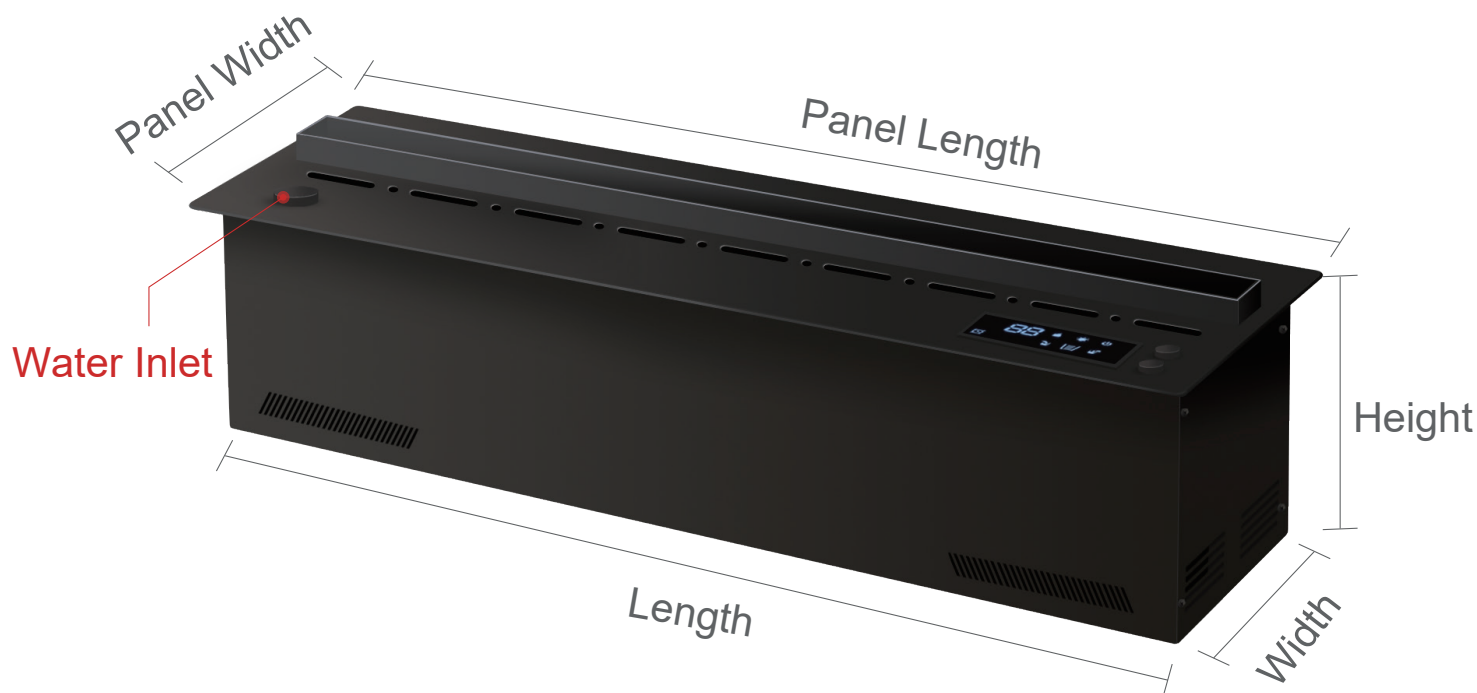

- 3mm ultra-thin panel ventilation
- The length of the ultra-thin flame port reaches 95% of the entire length
- The flame size has 5 levels of adjustment
- Comes with firewood burning sound
- Intelligent hydration
- Water shortage and dry burning protection
- Touch screen control and 360-degree remote control
- Anti-leakage protection
- Timing function
- Decoration and humidification functions
- Automatically stop adding water when the water is full
- Comes with voice broadcast
- Free switching between multiple colors of APP

• Manual water adding model

How to add water: Put the funnel into the water filling port and add water manually 

Flame color: single color flame/nine color flame
