How to Use

1. Press ON/OFF for the first time, and the high gear of the machine will work, and the red light will be on;
2. Press ON/OFF for the second time, the low gear works, and the green light is on;
3. Press ON/OFF for the third time to shut down and turn off the light;
4. When the light flashing, it is lack of power;
5. The light shows red when charging, and turns green when fully charged.

How to assemble the brush heads?

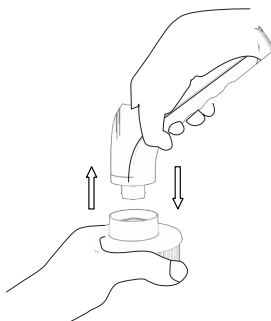

Select the appropriate brush head according to the cleaning requirements.

Note: Before assembling any component of this product, make sure the unit is turned off, then make sure the brush head is firmly installed.

How to pull out the brush head?

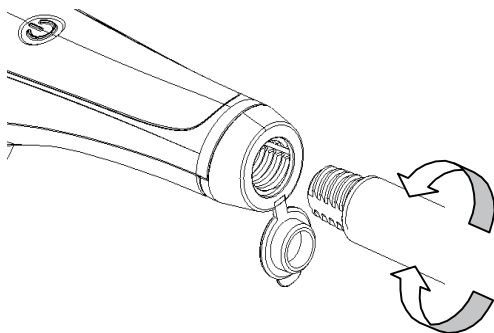

Hold the connection part of the brush head and pull out vertically.

How to install the extension tube?

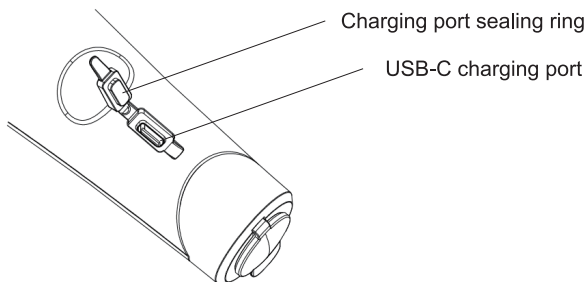

Pull out the silicone plug behind the host of the electric cleaning brush, screw the threaded end of the telescopic rod into the threaded hole of the host of the cleaning brush, twist until tightened.

Note: Make sure that the telescopic rod and the host are not loose before use.

How to Charge

Open silicone charging cover and insert the USB for charging, make sure it is fully inserted. Next, plug adapter into electrical outlet.

1. When the spin scrubber is being charged, the indicator will display Red color.
2. When the spin scrubber is fully charged, the indicator will display Green color.

Notice: please remove the adapter in time when fully charged , please make sure that the silicone cover is closed to avoid water entering.

How to Clean

Handle Part

Gently wipe handle part of the scrubber with a wrung soft cloth.

Brush Head

Disassemble the brush head and immerse it into the water to clean. Clean it with neutral detergent if it is difficult to clean. Brush Head can be soaked in water.

Cleaning tips

1. For better cleaning effect, it is recommended to use the brush with detergent (such as Mold and Mildew Remover, water strain Remover, oven cleaner, Bleach cleaner, All Purpose Cleaner). You could use different detergents for different needs.

2. For removing stubborn stains, please soak stains into water and detergent for a while, and then use the scrubber to clean , it will shorten your cleaning time.

Suggestion for storage

Store the scrubber in a ventilated and shade place. Avoid placing it in a wet place or being exposed to strong sunlight.

Trouble Shooting

Why doesn't the red indicator light while charging?

1. check if the USB cable was inserted to the bottom.
2. check if the charging socket is abnormal or power outage.
3. If the indicator light is green after plugging in the adapter, the product is fully charged, just turn it on to use.
4. If neither of the above two conditions, please contact us by Amazon or 7days*8hours brand service by brand Email or brand website chat: support@https: //windele.com or https: //www.windele.com

The charging indicator light doesn't turn to green after charging over 5 hours.

1. please check whether the socket and charging connection are loose , plug them tightly before charging.
2. If the product is immersed in water during use , it will damage the internal circuit and cause abnormal charging.
3. If neither of the above two conditions, please contact us by Amazon or 7days*8hours brand service by brand Email or brand website chat: support@https: //windele.com or https: //www.windele.com

Why does the brush head stop spinning while working?

1. The red light flashes for 30s and then stops, it may be that the user presses the brush head too hard to cause the product to stop automatically in the protection state. Only switch the ON/OFF button once or twice to return to normal.
2. If the red light keeps flashing and doesn't stop, it means that the product is in a low battery, and it needs to be fully charged before use.
3. If neither of the above two conditions, please contact us by Amazon or 7days*8hours brand service by brand Email or brand website chat: support@<https://windele.com> or <https://www.windele.com>

Why does the charging indicator turn green (representing a full charge) but the brush head does not spin after being turned on?

1. Please check whether the brush head is tightly connected with the extension rod and handle. For the connection method, refer to the installation guide.
2. If neither of the above two conditions, please contact us by Amazon or 7days*8hours brand service by brand Email or brand website chat: support@<https://windele.com> or <https://www.windele.com>

Why does the brush head spin less than 90 minutes or not work after pressing ON/OFF button twice when the battery is fully charged?

Each user will use different force during use. If you keep pressing the brush head too hard, the working time will be less than 80 mins. In order to prolong the use time, please don't press the brush head too hard, and frequently press it too hard will break the brush head.

Maintenance

1. If you do not use this product for a long time, please charge it at least once a month.
2. Waterproof grade IPX8, and the main engine can be cleaned with water. After use, please clean the body and tube with a dry cloth, wipe off the water and let it dry naturally.
3. Forbidden to cover strong corrosive liquid on the surface.
4. The DC hole is waterproof, please put back the silicone cover after charging.
5. Do not bake this product with high temperature fire.
6. After using the cleaning accessories, please let them dry naturally.

Warm Tips

1. Allow for transportation safety, the product you obtained is not fully charged please fully charge the product before first use.
2. Before using the scrubber, be careful not to get splashing stains into your eyes or on your skin.
3. When the battery is low the red indicator light will flash, please charge the product in time.
4. When charging , the red indicator light is on , If there is no red light, please plug the adapter correctly, then press the power button again.
5. Please close the silicone cover after charging to avoid water entering to cause the short circuit.
6. Please check whether there are any missing parts after receiving the product.
7. Please make sure that the scrubber is well-assembled before use.
8. Small scratches may occur when cleaning the surface of stainless steel, polished resin, artificial marble, wood, etc, please try to confirm beforehand. Please try it out in a small area and make sure that there are no abnormalities before cleaning.
9. Brushes are consumable which are not applicable to the warranty.

10. Please keep the power cord plug and hands dry to avoid the risk of electric shock.
11. Do not disassemble, repair or modify internal parts by yourself, please contact Us if you have quality problems.
12. Always use proper eye protection when using the power scrubber with irritating substances. Rubber gloves are also recommended.
13. When changing accessories, please make sure to turn off the machine first.
14. Keep the hair, cloth or other parts of your body away from brush head to avoid convolving

FCC Statement

Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE :

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected .
4. Consult the dealer or an experienced radio/TV technician for help.
