Filter

Power Cord

*The filter and power cord are packed inside the air purifier. Please open the bottom cover to take them out.

Before Use

1. Open the package.
2. Take out the unit and the filter.
3. Remove the protective bag from the new filter before installation.
4. Align the filter locking notches and tighten the filter buckle in the  direction.
5. Do not block the air inlet and outlet, e.g., by placing items on the air outlet or in front of the air inlets closer than 20cm.
6. Please use the adapter we have supplied. If use other adapter, please check if the voltage indicated on the appliance corresponds to the local power voltage before you connect the appliance.
7. Please insert the plug into the power socket firmly. After switching the power on, the indicator light will flash.

How to Use the Air Purifier

▶ Power on

Connect the power cord, wait for the standby indicator light to illuminate, touch the power button , and the machine will start running. The default mode is automatic mode with mid-speed settings upon turning on. PM2.5 values will be displayed on the screen after 30 seconds.

▶ Power off

Touch the power button  to select the high-speed mode, and press the power button again to turn off the machine.

▶ **Automatic Mode**

Touch the automatic mode button  to select automatic mode. It will adjust automatically based on the PM2.5 values. Sleep mode is for values between 0-80, mid mode is for values between 80-250, and high mode for values above 250. The PM2.5 values are for reference only.

▶ **Airflow Selection**

Touch the speed button  to switch fan speed modes, high-speed mode, medium-speed mode, and sleep mode.

▶ **Timer Selection**

Touch the timer button , the indicators of 2 hours, 6 hours, and 12 hours will light up. You can select the timing length you need (2H, 6H, or 12H). Press the timer button again to exit.

▶ **Check Filter Indicator**

When the machine's operating time reaches the lifespan of the filter (1440 hours), the timer button light  will flash, signaling the user to replace the filter.

▶ **Aromatherapy**

Enhance your indoor air with your favorite scent by adding 4-5 drops of essential oil to the top aromatherapy pad.

How to Replace the Filter

1

Turn off the air purifier, then turn it upside down and rotate the twist handle clockwise to unlock the base cover.

2

Please remove the packaging from the new filter before using it.

3

Take out the used filter and align the new filter with the filter locking notches for proper installation.

4

Align these two marks first, then rotate the base cover and tighten the buckle until it locks correctly.

5

! Notice:

1. Please use an original filter from PRASKY that matches the GL-K803 air purifier to ensure the best fit and filtration. DO NOT use other filters.
2. After the replacement is completed, turn on the air purifier and press the timer button for 5 seconds to reset. You will hear a beep sound after a successful reset.

Precautions

1. When moving or cleaning the air purifier, please stop operating it and unplug the power cord.
2. Pay attention to the correct installation of the filter.
3. Keep a distance of at least 20cm between the product's air intake and other obstructions.
4. Regularly clean dust, hair, and impurities from the surface of the filter to reduce bacterial growth.
5. Clean dust and impurities blocking the product's air intake to prevent a decrease in airflow.
6. When not using this product for a long time, please cover the top air outlet grille to prevent dust from entering and keep the outlet grille and internal fan blades clean.
7. If the product is abnormal, such as abnormal noise, odor, high temperature, or irregular fan rotation, please stop using it immediately.

8. Do not place hair, fabric, etc. close to the product to avoid entangling or blocking the air inlet hole and the air outlet grille.
9. When using the product simultaneously with household gas appliances (such as gas stoves and water heaters), please ensure proper ventilation to prevent carbon monoxide poisoning.
10. Do not pour liquid, powder, debris, or fine matter into the product from the outlet grille.
11. Avoid excessive pulling, twisting, or bending of the power cord to prevent exposed wires or breakage.

Maintenance

1. Do not spray water on the product and Do not splash water onto the filter.
2. Do not use it on watery floors or in humid environments such as bathrooms to avoid the risk of electric shock.
3. External Cleaning: Wipe the product's body with a soft damp cloth. Do not use strong solvents or detergents as they may damage the surface coating.
4. Internal Cleaning: Clean the interior with a soft damp cloth.
5. Replace the filter every 2-4 months. It varies depending on the area and ambient air quality. The filter replacement cycle may be reduced in heavily polluted areas, smoking areas, etc. When the filtering effect is poor, please replace the filter.
6. Especially the air intake, ensure the product is kept away from open flames and devices such as candle holders, incense burners, stoves, fireplaces, lighters, igniters, and fire bowls.
7. Keep the product away from high-temperature heating appliances such as electric heaters, space heaters, electric stoves, and irons.
